

Classic Home Care

Because There's No Place Like Home

Choosing the right caregiver for your loved one can be a daunting challenge. Stacy Hulsey understands your concerns and founded Classic Home Care to help set your mind at ease. Prior to starting Classic Home Care in 2009, Stacy was an independent contractor, providing physical therapy for many healthcare companies in the area. "I noticed that while the therapy services were benefitting my patients, I had no control over other services the patient had or needed that were often sub-par," said Stacy. "So I developed Classic Home Care with the goal of wrapping my arms around the whole patient and giving them superior services in every category."

Trying to meet all the needs of your loved one on your own can be exhausting and overwhelming. Classic Home Care offers your loved one many advantages, most importantly remaining in the comfort and familiarity of home, close to loving family members. Stacy and her carefully selected team of professionals provide medical care combined with a compassionate touch, allowing patients to remain in the environment where they are most comfortable – their own home.

THE COMPLETE PACKAGE

As a physical therapist for 16 years and working in the home health field for 11 years, Stacy Hulsey was uniquely qualified to design an agency aimed at meeting the very specific needs of patients receiving healthcare in their homes. A therapist and a nurse serve as administrators at Classic Home Care, allowing both the medical aspects of care provided through nursing and the functional aspects of care provided through therapy to be completely integrated in the patient's plan of care. This unique feature means Classic Home Care is able to provide more comprehensive, quality care for each patient with the ultimate goal of keeping the patient safe, comfortable and happy at home. The Classic team is committed to assisting the entire family by helping to relieve the stress every family experiences when a loved one needs assistance. And the care doesn't stop at 5pm on weekdays. Classic Home Care offers weekend admissions and 24-hour on-call staff, as well as longer

People who may benefit from home health include those with:

- balance problems or falls
- decreased mobility
- uncontrolled diabetes
- uncontrolled high blood pressure
- complications after stroke or other neurological diagnoses
- new medications or diagnoses
- frequent hospitalizations
- respiratory problems
- changes in mental status
- chronic pain
- wound care needs

normal business hours to assist physicians at the end of the day. Classic Home Care is the complete package of care for your loved one.

THE CLASSIC HOME CARE TEAM

“Our therapy team sparkles,” said Stacy. “We do not contract out most of our services, but instead have our own employees who share our vision and commitment to quality patient care. We can literally pick which therapist is best for each patient based on diagnosis or personality. Our completely capable staff will serve the patient’s needs and impress anyone who refers to our agency.” Classic Home Care is Medicare Certified and is a provider for multiple other insurance companies, as well. Additionally, the agency

is Joint Commission accredited, indicating they meet higher documentation, administrative, and safety requirements as compared to home health agencies that are CHAP or ACHC accredited.

WHAT IS HOME HEALTH CARE? IS IT RIGHT FOR MY FAMILY?

Home health is designed for patients who have increased fatigue and/or difficulty leaving the home and who do so infrequently and in short durations. It allows the patient to be more independent in their home and can be provided for patients in their own home, Independent Living Facilities or Assisted Living Facilities. Services are typically 100% covered for patients with traditional Medicare part A benefits.

Classic Home Health provides physical therapy, occupational therapy, or speech therapy in the home setting instead of in a clinic. Services may also include nursing visits to the home on an intermittent basis to be the “eyes” of the physician and provide any medical management that may be needed. Patients who are receiving the aforementioned services may also qualify for a home health aid to provide personal care such as bathing and dressing assistance, if needed.

“Almost all patients would benefit from skilled home health services,” said Stacy. “We would love the opportunity to show you how well we can care for your loved one. They truly desire to remain in their home safely and we are able to assist them in meeting that goal with confidence.”

In addition to running her own business, Stacy and her husband Roger have two pre-school children that keep them very busy. In her spare time, Stacy enjoys working out, camping and entertaining family and friends. They attend Fielder Road Baptist Church in Arlington. 📍
